

System::disconnect

System::loggingIn

System::setLoggedInUser

```
graph LR; A[System::disconnect] --> C[System::setLoggedInUser]; B[System::loggingIn] --> C;
```

The diagram illustrates a dependency or call relationship. Two white rectangular boxes on the left, labeled 'System::disconnect' and 'System::loggingIn', have blue arrows pointing to a single gray rectangular box on the right labeled 'System::setLoggedInUser'. This indicates that both 'disconnect' and 'loggingIn' methods interact with or call the 'setLoggedInUser' method.
